New Plants *for 2013*

From *Acer* to *Viburnum* and *Agave* to *Tulbaghia*, there's a bumper crop of new plants for the coming year.

In this annual introductions issue, the plants we highlight are not just new—which is *always* exciting—they're also exceptional selections that hold the promise of performance in the landscape and in the garden center.

If you're looking for the unusual, it's here. And if you're looking for that new twist on a trusted workhorse, you'll find that here, too. But! If you don't find what you're looking for in these pages, check us out online. More than 170 plants were submitted this year from nearly 40 sources, and our eco-conscience required that we present the entire selection digitally. Trust us: You'll be hard-pressed to narrow down your own choices.

Crème Brule hibiscus

Photo courtesy of Fleming's Flower Fields

***Rodgersia* 'Bronze Peacock'**

Common name: Rodgersia

Trademark: PPAF

Introduced by: Terra Nova Nurseries, Canby, Ore.

Hardiness: Zones 5 to 8

Ornamental features: The darkest foliage of any rogersia; the leaves are thick, glossy, indented and make a great sculptural addition to your woodland garden; large trusses of tiny pink flowers emerge in late spring above the mound; in spring, the huge bronze leaves emerge like a peacock's tail; compact habit stays within bounds of container or garden

Habit and growth rate: Clumping, rhizomatous habit; 22 inches tall by 28 inches wide, with a 50-inch flower height

Culture: Part shade; prefers humus-rich, moist, well-drained soil

Pest/disease problems or unique resistance: Resents drought, but will tolerate dry conditions with some shade

Royalties: Yes

Availability: Liners

For more information: Scott Christy; scott@terranovanurseries.com
